

# EMDE CFA SYSTEMS

## SOLID FOUNDATIONS REQUIRE SMART SYSTEMS

### YOUR ECONOMIC ADVANTAGE

#### EMDE CFA SYSTEMS...

- » Are modular and compatible with all common rotary drives.
- » Increase your drilling depth efficiently — even when space is limited.
- » Allow quick setup and dismantling, saving time and operational costs.
- » Offer long service life with low maintenance demands.

### TECHNICAL PERFORMANCE

- » Concreting diameters NW 4" and NW 5"; closed system.
- » Designed for up to 80 bar concrete pressure.
- » Standard EMDE octagonal connectors or customized interfaces.
- » Robust tools for bore diameters from 350 mm to 1,200 mm.
- » Available in single- or double-walled central pipes.

### DRILLING TOOL ENGINEERING

- » Reliable soil removal and concrete flow during the drilling process.
- » Starters with various cutting geometries for soft to medium-hard soils and rock.
- » Optional pressure monitoring and lost corks for advanced control.
- » Integrated stop and deflection rings enhance safety and precision.

### SERVICE AND CUSTOMIZATION

- » Custom-built solutions tailored to your rig and individual project needs.
- » Spare and wear parts always available for minimal downtime.
- » On-site inspection, refurbishment, and retrofitting worldwide possible.
