

EMDE DRILL STEEL

LONGER LIFESPAN + INCREASED EFFICIENCY THROUGH MATERIAL INNOVATION

Field-proven and appreciated by project managers worldwide! Our **EMDE DRILL STEEL** connectors are the first choice for your drilling operations in extreme temperatures and abrasive soil conditions.

High-Performance Drilling with EMDE DRILL STEEL

- » Innovative alloy developed by EMDE for friction-welded connections.
- » Used in EMDE casings and drill bits.
- » Suitable for anchoring, geothermal and tieback drilling.
- » Available diameters: 114.3 to 177.8 mm.

Your benefits with DRILL STEEL

- » Longer service life compared to standard market products
- » Optimized durability
- » Cost reduction
- » Increased planning reliability
